MSc EVOLUTION AND HUMAN BEHAVIOUR

Canterbury
This MSc provides a solid foundation in evolutionary science, focusing on biological anthropology and psychology, while also giving you the freedom to choose modules that reflect your particular interests. The programme offers you the opportunity to enhance your skills and knowledge at a leading UK university with excellent facilities. Known as the UK’s European university, Kent is located in Canterbury, less than an hour from London by train and just two and a half hours from Paris.

About the programme
The MSc in Evolution and Human Behaviour is a unique combination of evolutionary anthropology and psychology taught by dynamic researchers. The MSc applies evolutionary, social and cognitive psychology to understanding human and non-human primate behaviour. In addition to your core studies in evolutionary anthropology and psychology, you can further augment your degree by studying topics including: primate conservation; cognitive psychology; neuroscience; environmental anthropology; and human ecology, among other possibilities.

With this MSc, you will be in a strong position to undertake further study for a PhD, or for careers outside of academia, all while enjoying an exceptional region and the home county of Charles Darwin.

Course content
A one-year MSc programme of 180 credits, also available part-time over two years.

Compulsory modules
- Advanced Statistics and Methodology
- Research Project

Plus at least two of the following:
- Advanced Topics in Human Behaviour
- Advanced Topics in Primate Behaviour
- Advanced Topics in Group Processes.

Potential supplementary modules
You also choose two further modules; possible options include:
- Advanced Topics in Evolutionary Anthropology
- Advanced Topics in Cognition in Action
- Cognitive Neural Networks
- Advanced Developmental Social Psychology
- Current Issues in Cognitive Psychology and Neuropsychology
- Advanced Topics in Intergroup Relations.

Non-credit seminars
Department Research Seminars in anthropology and psychology.

Who should apply
This degree is ideal for those who have studied undergraduate degrees in anthropology, psychology, biology or a related discipline. It is also open to students of other disciplines who can display a degree of prior knowledge of the subject.

You need to hold a first degree in a relevant discipline with a grade of at least 2:1 or its equivalent.

How to apply
Online at www.kent.ac.uk/studying/postgrad/apply
