PSYCHOLOGY

Canterbury
Psychology is the study of people – how they think, act and interact. Psychologists can use their knowledge and skills to investigate questions such as: ‘How can we ease the effects of parental divorce on children?’ or ‘How do people behave on a first date?’ It’s a fascinating subject for anyone with an interest in human behaviour.
## Why Study Psychology at Kent?

### A choice of degrees
We offer two pathways: three- and four-year degrees that are accredited by the British Psychological Society and two Business Psychology degrees for those who want to focus on the study of individual and group behaviour in the workplace.

### Study abroad for a year
If you take Psychology with a Year Abroad you spend a year at one of our partner universities in Europe. You are taught either in English or in the native language and most students find that this year greatly increases their skills and confidence.

### Take a placement year
We offer four-year degrees that allow you gain a year’s experience with organisations such as the NHS, the Prison Service or a research establishment. Business Psychology students may be able to spend a year working within a business environment.

### Work Experience Scheme
Our excellent links with local schools, charities and the Probation Service make it possible for you to take part in organised volunteering. In each of your study years, you have the chance to collaborate on a project as part of our Work Experience Scheme.

### Academic support
University is different to school. You need to be self-motivated and well organised to succeed. We help you make the leap by assigning you an academic adviser and running a peer mentoring programme. You can also get help with academic skills, such as essay writing.

### State-of-the-art facilities
Our impressive facilities give you access to eye-tracker technology, EEG equipment for monitoring brain function, brain stimulation laboratories, physiology laboratories, child-friendly testing spaces, a virtual reality lab, group dynamics labs and observation suites.

### Lively campus
Kent is a campus university, so everything you need is within walking distance. You can watch a play or a film at the Gulbenkian arts centre, dance at The Venue nightclub, keep fit at our sports centre and meet friends at one of the many campus cafés and restaurants.

### Professional accreditation
Seven of our undergraduate degrees are accredited by the British Psychological Society, providing eligibility for Graduate Membership and the Graduate Basis for Chartered Membership. This is the first step towards becoming a Chartered Psychologist.

### Career success
Employability is a priority at Kent. By studying, you broaden your subject knowledge and sharpen the skills that are useful in working life. You have opportunities to gain work experience, as well as access to careers advice, workshops and employability events.
Take part in a professional research project

In your second year, you have the chance to participate in our Research Experience Scheme (RES) to gain practical experience of ongoing research projects. Examples of past projects include: Effect of High and Low Arousal on Memory; Living through Landscapes; Designing and Evaluating a Dementia Friendly Garden; Offering and Demanding Collective Apologies; Understanding Irony by Children; and Risk Factors of Sexual Offending.

Independent rankings

The Complete University Guide 2020
• Psychology at Kent was ranked 21st in the UK.

The Guardian University Guide 2019
• Over 93% of final-year Psychology students were satisfied with the overall quality of their course.

Destinations of Leavers from Higher Education
• Of Psychology students who graduated in 2017 and completed a national survey, over 97% were in work or further study within six months.

Research Excellence Framework
• Based on the most recent Research Excellence Framework, Kent was ranked 8th for research intensity by the Times Higher Education.

Teaching Excellence Framework
• Kent was awarded gold, the highest rating, in the UK government’s Teaching Excellence Framework.*

*The University of Kent’s Statement of Findings can be found at www.kent.ac.uk/tef-statement
Rosie Morris is in the final year of her BSc (Hons) in Psychology.

What attracted you to studying at Kent?
The research is a big thing to take into consideration because if your lecturers are doing good research, you know they're really up to date. The labs also stood out for me. Kent has several psychology labs with a lot of impressive equipment.

How are your studies going?
I've always been quite independent, but my degree really developed that skill. If you work hard here, you are going to do well and it's going to pay off. The first and second years are quite structured to ensure that you get your BPS [British Psychological Society] accreditation. I covered every area of psychology and that allowed me to make a direct comparison and work out what I found interesting. That definitely helped when I was deciding my third year options.

What about academic support?
You get more independence, but there's plenty of support too. There's a student-led Peer Mentoring Scheme that helps a lot of people in their first and second years. There are also drop-in sessions where you go to a talk about a specific thing, such as essay writing.

The lecturers allow time for students to ask questions and they are definitely up for a debate. Also, they have office hours so you can drop in to get advice – it's a very different relationship to the one with teachers at school. They provide you a lot of support for the essay writing and the feedback is really good. I've definitely seen my writing improve over the three years.

What about the social scene?
The campus itself is not too large and that gives it a good community vibe. There's the cinema and theatre, the nightclub, the gym, the library and the study hubs, as well as shops – it feels like a small village, I think. During the first year when you've just moved from home, it is nice to have a place that's yours.

My favourite venues are Caffè Nero and Dolce Vita. I go to the gym a lot and I'm quite passionate about that. And I think that really helps with the studies to be honest – especially when deadlines are coming up.

How did your degree prepare you for the world of work?
They have a lot of work-related schemes. Last year I took part in RES which is the Research Experience Scheme, where you get to be a research assistant on a current project. The work can include everything from data analysis to interviews.

I worked on a research project that is looking at the effects of creating dementia-friendly gardens in care homes. It's in collaboration with the charity Age UK; there are 30 care homes so far and they're all going to be transformed. So that was a great thing to take part in. There's also the Work Experience Scheme, which is similar but with external organisations.

I'm also a student representative within the School of Psychology. It's good experience and you get to see behind the scenes.

What about career advice?
I feel like my School have been really helpful in advising me, particularly my project supervisor. They also have a lot of external speakers in, about one a month. So last year, when I was interested in clinical psychology, I went to one by a clinical psychologist who had done her degree at Kent. And there's also the Psychology Society, who get a lot of speakers in.

Originally, I thought I wanted to work in a hospital. But then, going into the final year and working on a research project with a member of staff, I saw how collaborative research is. So now I'm going for a funded Master's and PhD.

Any advice for somebody thinking of coming to Kent?
Try and build a good relationship with your lecturers. They are often presenting their own research; they really appreciate the engagement.

For more information on the Research Experience Scheme, see p5. For details on the Work Experience Scheme, see p4.
CHOOSING YOUR DEGREE

Not sure which programme to choose? Here’s a quick guide to the Psychology degree programmes we offer.

**Single honours degrees**

- **Business Psychology**
- **Business Psychology with a Placement Year**

These programmes offer training in coaching and mentoring to be applied to organisational settings. Modules cover personal and professional development and leadership skills. In the four-year placement programme, you spend a year in business and complete a research project. (Please note: we are not able to guarantee business placements.)

- **Psychology**
- **Social Psychology**

These three-year programmes highlight the study of cognition and behaviour in their social and cultural context. They train you in experimental methodology, as applied to issues and problems of human social relationships, and emphasise the practical value of psychology.

- **Psychology with Clinical Psychology**

This three-year programme allows you some specialisation in Clinical Psychology in your final year. The course follows the Psychology degree programme with the additional compulsory modules Clinical Psychology 1 and 2. The degree is especially suited to you if you are thinking about a career in the health or social services.

- **Psychology with Forensic Psychology**

This three-year programme includes modules and additional training that focus on applying psychological theory to understanding criminal behaviour, reducing offending and understanding victim responses to offending behaviour.

- **Psychology with a Placement Year**
- **Psychology with Clinical Psychology and Placement Year**

The placement year programmes last for four years. They are the same as the three-year programmes (described left), except that in the third year you do project work with professional applied psychologists in organisations such as the NHS, the Prison Service or a research establishment. Placements are subject to availability, and you have to meet the required academic standards in your first and second years in order to participate. You complete your degree studies in the fourth year.

- **Psychology with a Year Abroad**

This four-year programme gives you the opportunity to spend a year studying psychology at one of our partner institutions in Europe.

- **International Foundation Programme**

If you are applying from outside the UK without the necessary English language qualifications, you may be able to take the Kent International Foundation Programme (IFP). The Kent IFP can provide progression to a Psychology degree programme. For details, see www.kent.ac.uk/ifp
YEAR ABROAD/ PLACEMENT YEAR

At Kent, you have the opportunity to broaden your experience either by studying overseas or through a work placement.

Some students can apply to spend a year studying abroad or on placement as part of their degree programme (see left). The year usually takes place between the second and final years of study.

Year abroad
Going abroad as part of your degree is a great opportunity and a chance for you to develop academically, personally and professionally.

You gain confidence and independence and further develop many of the transferable skills employers are looking for, such as the ability to communicate effectively and being able to plan and organise your time. You also demonstrate that you are flexible in your outlook and have the enthusiasm and drive to succeed in a new environment.

For many students, their year abroad is a life-changing and rewarding experience. Having risen to the challenge of living in another country, they have a renewed belief in their ability to succeed.

For details of where you can study, see the A to Z course list at: www.kent.ac.uk/goabroad/opportunities/az.html

Placement year
The placement year provides the opportunity for you to gain experience in the workplace as part of your degree. The year offers you hands-on experience and the chance to put theory into practice.

If you are studying Psychology or Clinical Psychology you could spend a year in an organisation that delivers a psychological service, such as the NHS, a school or college, the Prison Service or a research institution. This is subject to availability and academic achievement. If you are studying Business Psychology, your placement could be based within a business environment and may be related to areas such as coaching, selection and assessment, or talent management.

There are many benefits to taking a placement year: it gives you the chance to gain some knowledge of the work environment, acquire new skills and develop your confidence. It also gives you the opportunity to increase your contacts and networks, so you can hit the ground running when you graduate. The year is assessed using a variety of methods, including a research project, a reflective diary and a poster.

Tuition fees for the placement year are greatly reduced and employers may reimburse travel expenses or offer a bursary or stipend to help towards additional costs.
YOUR STUDY PROGRAMME

Your studies are divided into three stages: Stage 1, Stage 2 and Stage 3. If you are spending a year abroad or on a work placement, you do this between Stages 2 and 3.

Teaching and assessment
Teaching is by weekly lectures and workshops, plus additional seminars. Psychology Statistics and Practical modules include laboratory practical sessions, statistics classes, computing classes and lectures in statistics and methodology. All modules involve considerable periods of individual study.

The School holds weekly informal workshops for students and provides one-to-one support through drop-in sessions. Workshop themes have included writing under pressure, creating presentations with impact and tips for the summer exams.

Most modules are assessed by a combination of coursework and end-of-year examinations. At Stage 3, assessment is by a dissertation and a combination of examinations and continuous assessment. Your Stage 1 marks are not carried forward to your final degree result; marks at Stages 2 and 3 do count towards your final result.

Module information
Please note that the module lists given here are not fixed, as new modules are always in development and choices are updated yearly.

The details are correct at the time of publication (June 2019). For the most up-to-date information, see www.kent.ac.uk/ug

To read a full description for any of the modules listed here, go to www.kent.ac.uk/courses/modules and search for the relevant module code.
Stage 1
There are three compulsory modules:
• Introduction to Biological and General Psychology (SP301)
• Introduction to Social and Developmental Psychology (SP302)
• Psychology Statistics and Practical (SP300).

You take two further modules from across the University. The following are offered by the School of Psychology as optional modules:
• Business Psychology: An Introduction (SP311)
• Introduction to Forensic Psychology (SP306).

If you are taking Psychology with Forensic Psychology or one of the Business Psychology degrees, your compulsory modules include one of the two modules listed above.

If you are taking Psychology with a Year Abroad, you take either a double language module instead of the optional modules, or two modules in European politics, depending on the teaching language of the institution where you are studying.

Stage 2
Your second year of full-time study builds on topics that you were introduced to at Stage 1. You take the following compulsory modules:
• Biological Psychology (SP604)
• Child Development (SP528)
• Cognitive Psychology (SP605)
• Personality (SP529)
• Psychology Statistics and Practical (SP500)
• The Social Psychology of Groups (SP619)
• The Social Psychology of the Individual (SP620).

Business Psychology degree students take some of the modules above in addition to the following:
• Developing Leadership, Enterprise and Initiative Taking Skills (SP649)
• Topics in Business Psychology (SP650).

Psychology with Forensic Psychology degree students take all of the compulsory modules and keep a Forensic Psychology Log.

Psychology with a Year Abroad students take some of the compulsory modules above plus further modules in their chosen language or in European politics. (The remaining compulsory modules are taken in the final year of study).

Stage 3
At Kent, we give you the chance to develop your own passions, and the breadth of our research allows you to specialise in areas of particular interest to you. Research in the School is structured around four main themes:
• social psychology, which covers issues such as prejudice, social inequality, group dynamics and personality
• cognition and neuroscience, focusing on visual cognition, attention, memory, and language and communication
• forensic psychology, exploring psychological processes underlying offender behaviour
• developmental psychology, investigating aspects of social and cognitive development across the lifespan, as well as neurodevelopmental disorders.

“The School holds an informal talk once a fortnight, followed by a social get-together – it’s called Café Psychology. A lecturer will speak about an area they are researching and sometimes give demonstrations of the instruments they are using, like the EEG, for instance, which measures brain waves.”

Gul Afroz Moin
Psychology

CONTINUED OVERLEAF
YOUR STUDY PROGRAMME (CONT)

Our ongoing research feeds into the optional modules you are offered in Stage 3, ensuring that your studies reflect current developments. Your final-year research project gives you the opportunity to become involved in contemporary research too – helping to move the field forward.

Compulsory modules
Your final year of full-time study allows you to follow special interests. You take two compulsory modules:
• Applying Psychology (SP633)
• Psychology Project (SP582)/Clinical Psychology Project (SP583)/Forensic Psychology Project (SP587)/Business Psychology Project (SP648).

The project is typically conducted by students in pairs or in larger groups, and is supervised by a member of staff. Students must pass the project to obtain an honours degree.

Students on the Business Psychology programmes also take:
• Evaluating Evidence: Becoming a Smart Research Consumer (SP636)
• Groups in Action (SP603)
• Business Psychology in Practice (SP652)

Optional modules
Depending on your programme, you also take between one and four optional modules from a range relating to our research areas.

The following optional modules are currently offered at Stage 3:
• Advanced Developmental Psychology (SP580)
• Attitudes and Social Cognition (SP612)
• Cognition in Action (SP566)
• Culture and Psychology (SP642)
• Evaluating Evidence: Becoming a Smart Research Consumer (SP636)
• Evolution and Universal Motivation (SP608)
• Forensic Psychology: Theoretical and Applied Perspectives (SP637)
• Groups in Action (SP603)
• Language and Communication (SP616)
• Mental Health: Diagnosis, Interventions and Treatments (SP641)
• The Neuroscience of Cognitive Disorders (SP611)
• Psychoanalysis (SP639)
• Psychology of Music (SP643)
• Researching People with Learning Disabilities (SP601)
• Understanding People with Learning Disabilities (SP602).

Students on the Clinical Psychology programmes also take the following compulsory modules:
• Clinical Psychology 1 (SP597)
• Clinical Psychology 2 (SP598).

Students on the Psychology with Forensic Psychology programme also take:
• Forensic Psychology: Theoretical and Applied Perspectives (SP637).
SUPERB STUDY SUPPORT

We’ll support you throughout your time at Kent, from helping you adjust to university study to discussing module choices and essay topics with you.

Academic adviser
You are assigned an academic adviser in your first year, and they help you get the most from your degree programme. You meet with them regularly to discuss general academic issues or specific assignments. They can also assist you in developing academic skills and refer you to other sources of help if you need it.

Peer support
The best advice often comes from people who’ve been in your situation. On our Academic Peer Mentoring scheme, first-year students can request to be matched with second- or third-year students on a similar degree programme.

Peer mentors can help you settle in to university life and find your feet. They can help you to discuss ideas and improve your study skills as you progress through your first year.

Study skills advice
Successful students take control of their own learning. Kent’s Student Learning Advisory Service (SLAS) can help you increase your competence and confidence and fulfil your potential. You can request a one-to-one appointment or attend workshops on a diverse range of topics from making the most of lectures to writing well and effective revision skills.

Student support and wellbeing
You might need extra help to get the most from university. If you have a medical condition, specific learning difficulty, mental health condition or disability, the Student Support and Wellbeing team is there to support you.

They are committed to improving access to learning for all students at Kent and can assist with many things, including:
• talking to your lecturers about any help you need in lectures or seminars
• arranging note-takers, signers and other support workers for you
• discussing exam access arrangements
• helping you with emotional, psychological or mental health issues
• applying for relevant funding to support you.

You also benefit from the School of Psychology’s own student support team. You can arrange a meeting with our Student Support Manager to discuss any pastoral, health or welfare issues.

Find out more at: www.kent.ac.uk/studentsupport
A SUCCESSFUL FUTURE

What do you hope to do once you have your degree? Whether you have a specific career path in mind or haven’t yet thought much beyond university, we can help you to plan for success in the future.

Build your CV
Your degree studies help you to develop skills such as thinking critically, expressing yourself clearly, solving problems and working independently and as part of a team. These transferable skills are valued by employers and will also be vital if you go on to further study.

At Kent, you have lots of other great opportunities to enhance your skills. For instance, you could:
• join a society or sports club (even better – get involved in running it)
• do voluntary community work
• work in a part-time job or take up a summer internship
• represent your fellow students as a student rep, or become a student ambassador
• learn a new language or skill with Study Plus.

Getting involved like this means you can earn Employability Points, which you can exchange for employability rewards. We work with local, national and international employers to offer internships, work experience and a range of other activities that prepare you for the world of work. The more points you earn, the more valuable the rewards.

Experience work
All of our programmes include the opportunity to be involved in a collaborative project and establish working relationships. Some opportunities will be based in the School of Psychology and others involve volunteering with local organisations such as charities, schools and the Probation Service. All our undergraduate students are able to apply for the Research Experience Scheme (RES) and the Work Experience Scheme (WES).

For students on a Placement Year degree, it is possible to spend a year working with professional psychologists in, for example, the NHS, the Prison Service, or another government agency.

The School has its own Student Experience and Placements Officer who supports students in all aspects of work-based experience including the Placement Year, the Research Experience Scheme and the Work Experience Scheme.

Find a great job
Our graduates do well in a wide range of careers. Some have gone on to qualify as clinical, forensic or occupational psychologists. Others have found careers in related subjects such as therapy, teaching or social work, or have gone into professions where communication skills are important, such as public relations, marketing, publishing or media work.

Our track record speaks for itself: over 95% of Kent graduates who responded to the most recent national survey of graduate destinations were in work or further study within six months (DLHE, 2017).
Maryam Keshavarzi graduated from Kent in 2018 with a BSc (Hons) in Psychology with Clinical Psychology. She now works as a Senior Assistant Psychologist.

What attracted you to studying at Kent?
I live in Kent with my family, so location was a key factor for me. I also knew that Kent’s School of Psychology ranked highly, so it was an easy choice for me.

How was the course and the teaching?
I thoroughly enjoyed my studies. As a mature student it was fantastic to be back in education. The forensic psychology teachings were the best. The hottest debates happened in those lectures – great fun!

Overall the teaching was very good. Naturally each lecturer has their own unique style of teaching, so it is down to personal preferences, but the standard is high. I loved being in a learning environment and I really miss it now.

Which areas did you find most interesting?
To be honest, it was all very inspiring and that pulled me in many different directions – there was so much that I was interested in and wanted to get involved in. I did my best to do that over the three years. Being on the Clinical Psychology course limited my choices in the final year, but it was clinical psychology that I wanted to pursue, so I didn’t mind that.

How would you describe your fellow students?
I can’t seem to find a sentence that would describe over 200 people of mixed races/ethnicities/ages, so I’d say we were a varied bunch. As a mature student with a family, I can’t say I engaged with the student ‘social life’ as such – I had one outside uni to try to maintain. But I did make a couple of friends for life and other valuable lasting connections.

Did your course help you to prepare for a future career?
I wouldn’t be doing the work that I am today without this degree. I went to most of the career fairs and talks that Kent organised and it was at one such event that I met my current employer, the Managing Director of Psicon, and asked for a volunteering opportunity. This was granted and during my third year it turned into a paid position. After graduation, it turned into full-time employment.

Can you describe your current role?
I currently work as a Senior Assistant Psychologist at a psychology and wellbeing centre. I am also operational lead for the NHS adult autism assessment service. The variety of my work is fantastic and it is providing me with a lot of varied clinical experience.

I play a part in the autism assessments and reports, as well as in their post-diagnostic psychoeducation and therapy. I also carry out many forms of neuropsychological testing for patients with brain injuries and prepare extensive reports for court.

What do you enjoy about your current role?
Having the opportunity of putting three years of theory into practice is great – learning to apply the psychological theories and to meet service users is amazing. For example, learning about autistic traits is one thing, but seeing it in service users is a totally different learning experience.

What are your plans for the future?
I returned to education with an open mind, not really knowing what to expect. I found it inspiring and sometimes challenging but the subject is so enthralling that it has given me the drive to continue. In the future, I hope to gain a placement on a clinical doctorate course.

What advice would you give a new student at Kent?
I would suggest to all students to make good use of the lecturers’ drop-in hours. I learnt a lot from the one-to-one conversations and got a few good opportunities from doing this.
Choosing a university is a big step, so it’s important to find out as much as you can before you make your decision. Come and visit us to see what we can offer you.

Open Days
Open Days are a great way to find out what life as a student at Kent is like. For instance, you can:
• learn more about the course you are interested in at a subject presentation
• ask questions – talk to the academic teams at the information stands
• experience our teaching at a taster lecture*
• try your hand at evidence gathering in our new state-of-the-art crime scene house
• find out about student finance, opportunities to study abroad and extracurricular activities such as those run by Kent Sport.

Applicant Days
If you apply to Kent and we offer you a place (or ask you to come for an interview), you will usually be invited to an Applicant Day.

Applicant Days run in the autumn and spring terms and are an opportunity to find out about the course in more detail. You spend time with your academic school meeting staff and current students, and take part in activities that give you a flavour of your prospective course and university life.

Informal visits
If you can’t make it to an Open Day or Applicant Day, you can still visit us. We run tours of the campus throughout the year.

If you live outside Europe, we appreciate that you might find it difficult to attend our scheduled events, so we can arrange a personal campus tour for you and your family.

Let us know you’re coming
Scheduled tours and personal campus tours (for international students) need to be booked in advance – you can do this via www.kent.ac.uk/informal

* Programme of events varies according to subject.
COME AND FIND OUT MORE (CONT)

Meet us in your country
Our staff regularly travel overseas to meet with students who are interested in coming to Kent. We also have strong links with agents in your home country who can offer guidance and information on studying at Kent. Find out more at: www.kent.ac.uk/courses/international

Self-guided tours
If you prefer to explore on your own, you can download a self-guided walking tour at www.kent.ac.uk/informal or pick up a copy from us.

A self-guided audio tour is available too, which allows you to learn about Kent without even leaving home. See www.kent.ac.uk/courses/visit/informal/audio-tour.html
