Please refer to the online Module Catalogue for full details of all modules:
www.kent.ac.uk/courses/modules

Note: It is ultimately your responsibility to ensure that you are registered for the correct modules for your course. Students should ensure that their optional modules are as equally balanced as possible between the Autumn and Spring terms. Although we do our best to make sure you get some of your choices, because some modules are more popular than others and we cannot run any module with too few students, we cannot always guarantee it.

The courses indicated with the † symbol are accredited by the British Psychological Society as conferring eligibility for Graduate Membership of the Society with Graduate Basis for Chartered Membership, provided you pass the empirical psychology project and gain at least a Second Class Honours degree. This is the first step towards becoming a Chartered Psychologist. All the following modules must be taken in order to qualify for BPS recognition: [PSYC5000](#), [PSYC5280](#), [PSYC6391](#), [PSYC6392](#), [PSYC6410](#) and one of [PSYC6002](#), [PSYC6003](#), [PSYC6004](#), [PSYC6480](#):

The Psychology courses indicated with the ♣ are accredited by the Association for Business Psychology.

**The Division of Arts and Humanities is undertaking a review of its courses and associated modules. This means there is a risk that some modules will not be available after OMR. Any changes will be dealt in line with [Kent's established process](#) as required by the Competition and Markets Authority (CMA). You should select your modules based on the list available. If there are any changes to your selection, you will be contacted as soon as possible with suggested alternatives. The review is planned to be completed by July 2023 at the latest.*

The information contained herein is correct at the time of publication. Please note, however, that if a module recruits fewer than 8 students it is possible that it will not run. In this event, you will be contacted and asked to select an alternative module.
