1) Introduction

This Bronze plan sets out Physical Response undertaken by Estates Landscape Management team in dealing with the different adverse weather conditions which may be experienced on the Canterbury campus. This is one of a number of Estates Bronze plans detailing what each section will do in the event of adverse weather.

It is acknowledged that between 1st Nov – 31st March annually, Estates Landscape Management team undertake their own “weather watch” and will respond to frost or icy conditions which do not result in a Met Office weather alert. Their approach to dealing with these conditions mirrors those set out in this Bronze Plan.

This plan should be read in conjunction with the HR Adverse Weather Policy - http://www.kent.ac.uk/hr-staffinformation/policies/a_to_z.html

2) Estates Adverse Weather Plan

This document should be read in conjunction with the Estates Adverse Weather protocol activation flow chart, see Appendix 1 of this plan

This plan will be implemented either receipt of a Met office Yellow Warning notification from Campus Security or instruction by SMT Silver team depending on severity of the alert.

3) Physical Response*

*All responses by Estates will be best endeavours due to weather conditions potentially limiting the ability for some staff to travel to campus.

The Grounds Manager or nominee will be responsible for checking stores of salt across campus regularly and ensure that the salt bins are full and salt stock levels are appropriate for the prevailing weather conditions. They will also ensure that when snow is forecast that the appropriate labour and mechanical plant is prepared and made ready for use. Where appropriate and at the discretion of the Grounds Manager, grounds staff will be permitted take grounds department 4x4 vehicles home to give them the best chance of attending campus the next day.

Please refer to snow and gritting clearance map in Appendix 2 of this plan

Priority 1 areas

- Giles Lane Carpark
- University Road
- Parkwood Road
- Giles Lane (KCC responsibility)

Priority 2 areas

- Building entrances
- Ramped access points to accommodation
- External fire Escape staircases
- Routes to accessible parking bays
- Secondary footpaths

Roads and paths will continue to be treated throughout the day while the temperature remains below freezing as labour, equipment and materials permit.
Communication

The communication of status of the Grounds Team’s progress in dealing with weather conditions is essential to the information made available to staff, students and visitors before they travel via social media operated by the Transport Team and Corporate Communications.

The method of communication of the ground team’s progress will be via University issued mobile phones using the “Kent Grounds” WhatsApp group.

Members of the “Kent Grounds” WhatsApp group are;

- Grounds Manager
- Grounds Supervisor
- Head of Facilities Management

The Head of Facilities Management (or Grounds Manager in his absence) will ensure relevant information is forwarded appropriately for consideration and dissemination to SMT silver team and Transport team as appropriate.

The following reports are considered essential at the times stated;

- **6:00 – 6.30am** - Confirm Grounds staff attendance.
- **7.00am** - To ensure accurate information regarding conditions on campus is provided to staff and students, a detailed report should be provided specifically including details around the road conditions (Giles Lane, Parkwood Road and University Road), and Giles Lane carpark specifically and well as a general detailed overview of the whole estate including estimated times to complete.
- **8am to 7pm** - Hourly updates or more frequent if required reporting on progress or if there is a significant problem that may cause issues with traffic movement on our own campus roads or pavements. Include what the problem is and how it is affecting the traffic or pedestrian movement.

All reports required to consider:

- Road Campus & paths gritting update
- Road & paths snow clearing update
- Road & paths conditions
- Car park conditions
- Car park gritting, clearing update
- Building entrances
