WP 4 – Aim and objectives

The purpose of the project is to test & develop models of sustainable (self)governance premised on community resilience, identity and existing critical infrastructures.

The objectives of this WP include:

- **To define in practice**, the project's core concepts, and map out a domestic-level 'ordering domain' (Flockhart 2018), as a foundation for understanding 'self-governance': *What is the meaning?*
- **To test models of (self)governance** via citizen juries and 'dialogue with a wider society': *How should it work?*
- **To prepare recommendations** for academic, policy and wider societal communities and platforms: *How to achieve more sustainable governance?*

Community Engagement in practice

- Assessing & testing the concepts: survey of target groups
- Mapping responsive modes of governance:
 - citizen juries of across generational and occupational lines
 - Dialogue with a wider society: Q&A sessions at a roundtable
 - Dialogue with target stakeholders (youths, business groups, female forums)
- Developing recommendations for more sustainable governance and resilience strategies
