Preface

This annual Research Publications Report is now only a web-based publication which draws together for each calendar year the information on the publications by Kent staff which are held on our Kent Academic Repository. The Kent Academic Repository or ‘the KAR’, fulfils a variety of important functions. It will allow us to monitor staff publications, and citations of them, in preparation for the REF (Research Evaluation Framework), the replacement for the RAE (Research Assessment Exercise). It allows us to meet our obligations to research funders to bring research outcomes into the public domain as quickly as possible. It enables searches to be conducted into the questions that Kent researchers have addressed, and it will raise the profile of the University's work on the major search engines.

However, ‘the KAR’ also allows us to produce these annual compilations of the substantial number of publications and presentations that Kent's staff produce in a year. In a large university this is useful to staff. They can see what colleagues are doing and the potential for cross-disciplinary work is increased. It also becomes possible for students and all those in the wider community who work with and support the University to see outcomes of research at Kent. Because this is essentially a continuously evolving data-base, it may contain some errors that will be corrected in the online version as they are found. The accuracy of entries is subject to verification, but individual staff members are responsible for monitoring and correcting their own entries.

Bulky as this document is, even in pdf format, I hope you will find gives you greater understanding of the range and depth of research at the University and that it will encourage you to visit ‘the KAR’ site.

This report was generated on Thursday 13th February 2014. It represents a snapshot of the Kent Academic Repository data on that date.

Professor John Baldock
Pro Vice-Chancellor for Research
# Table of Contents

**Central Services**
