This Emergency Plan has been developed following fire risk assessments of the relevant building.

The purpose of the Plan is

- to ensure the safety of all persons in the event of a fire
- to ensure compliance with the Regulatory Reform (Fire Safety) Order 2005
- to ensure adherence to official guidance and related Standards.

Copies of this Emergency Plan will be made available to any person on request.

Copies of the building Fire Risk Assessment are kept by the Responsible Person and the Safety, Health & Environment Unit, and are available for inspection by Fire Service officers and building occupants.

<table>
<thead>
<tr>
<th>1. Address of the premises to which this Fire Emergency Plan relates</th>
<th>Lumley (&amp; Aphra) Building University of Kent, Canterbury CT2 7NZ</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Occupier of the premises</td>
<td>University of Kent School of Drama, Film &amp; Visual Arts</td>
</tr>
<tr>
<td>3. Uses of the premises</td>
<td>Drama etc teaching, rehearsal, performance &amp; associated</td>
</tr>
<tr>
<td>4. Responsible Person</td>
<td>The Director of the School of Drama, Film &amp; Visual Arts has primary executive responsibility for building management, and is therefore the Responsible Person (in conjunction with Council and the Vice Chancellor) within the meaning of the Regulatory Reform (Fire Safety) Order 2005. Telephone number 01227 (82)7416</td>
</tr>
</tbody>
</table>
| 5. Other management responsibilities for fire safety | All Heads of departments using or operating within the building at any time, all relevant managers and Health & Safety coordinators, and all relevant academic/teaching/supervisory and associated staff or persons, have duties  
- under the above legislation and associated official guidance,  
- in accordance with the arrangements described in this Plan, and  
- according to University policy (see Safety, Health & Environment Unit’s published guidance).  
Deborah Metcalf-Askew, Drama Production Manager is the nominated Building Fire Officer and is responsible for overseeing fire safety arrangements in the building. Telephone number 01227 (82)7941 |
| 6. Fire warning arrangements | An electrical fire alarm system with manual call points and heat and smoke detectors is provided throughout the premises. The system and installation complies with BS5839 and associated guidance. Estates hold relevant plans. The fire alarm panel is located in the Lumley (eastern) entrance foyer/corridor.  
The general alarm signal is clearly audible throughout the premises. The alarm sound is a warbling siren.  
The alarm system is not currently linked either to Campus Watch or to the adjoining Grimond building. Fire and other emergencies must be reported immediately by telephone to Campus Watch. |
| 7. Action in the event of fire | On discovering a fire, persons should immediately retreat from the fire, raise the alarm at the nearest call point and evacuate. If an alarm call point is not available, they should telephone 3333 (or 01227 823333) *from a safe place* - this is the emergency Campus Watch number.  
On hearing the alarm signal, all persons present should immediately and calmly evacuate the premises by the nearest available emergency escape route, and ensure that someone has telephoned Campus Watch as above.  
Persons evacuating must  
- obey Building Managers’ and Fire Marshals’ instructions;  
- ensure others in the vicinity also evacuate;  
- assist any person who needs help, if safe to do so;  
- not stop to collect any personal belongings;  
- proceed directly to the correct Assembly Point (locations are indicated on Fire Action Notices near to all alarm call points);  
- remain there until officially instructed otherwise.  
Campus Watch will telephone the Fire & Rescue Service in accordance with current local procedures. |
|---|---|
| 8. Emergency escape routes | Emergency escape routes are clearly signed, and are kept immediately available and unobstructed at all times.  
All users of the building should ensure they are fully aware of both obvious/familiar and alternative escape routes. |
| 9. Arrangements for fighting fires | Fire fighting equipment is provided as determined by fire risk assessment, and maintained.  
Persons with no specific training are *not* expected to fight a fire, but all occupants and staff should familiarise themselves with the location and basic operating principles of the equipment, in case they need to use it (i.e. only in order to effect their escape, if cut off by fire).  
Departmental management is responsible for nominating and training persons to use fire fighting equipment, as necessary and/or determined by fire risk assessment.  
Campus Watch (Security) staff are nominated and trained to use the fire fighting equipment provided. |
| 10. Procedures for coordinating evacuation and for liaising with the fire brigade | When present, the Building Fire Officer or deputy will check the fire alarm panel and report the indications to Campus Watch, then control the fire evacuation at the front of the building and direct evacuating persons away towards the assembly point. |
On arrival, the Security Supervisor will take overall charge of the building.

Arrangements are in place for collating information from Fire Marshals to confirm complete successful evacuation of the premises, or otherwise.

The Building Fire Officer and/or Security Supervisor will give the following information to the officer-in-charge of the first fire appliance to arrive:

- whether the building is known to be fully evacuated; or whether persons remain in the building; or which areas have not been checked;
- any dangerous substances stored in the building that are likely to become involved (see sect. 16) including substances known/logged as temporarily present;
- where the seat of the fire is thought to be located; and
- the best route to get to trapped persons or the seat of the fire.

During inclement weather, the decision may be taken to accommodate evacuated persons in an adjacent building.

<table>
<thead>
<tr>
<th>11. Other key responsibilities in the event of fire</th>
<th>Sufficient nominated Fire Marshals (and where necessary, Door Wardens and persons nominated to assist those with disabilities) are provided. Records are kept of all nominated persons.</th>
</tr>

</tr>
<tr>
<td>- conducting regular fire safety inspections of their area and recording the results.</td>
<td><strong>Academic staff and persons leading or facilitating events have responsibility for ensuring that all students present evacuate safely to the final assembly point, and for reporting that the area is clear (or otherwise) to a local Fire Marshal or the person in charge of the building.</strong></td>
</tr>
</tbody>
</table>
### 12. Persons who are especially at risk

Fire risk assessments have determined that no persons are considered to be especially at risk from fire, provided that all relevant fire safety arrangements, as described in this Plan and the Fire Risk Assessment(s) for the building, are fully implemented and maintained.

Regular occupants and visitors do not include Young Persons. The occasional presence of Young Persons is covered by enhanced, attentive Fire Marshalling and the general Fire Emergency Plan.

### 13. Special arrangements for disabled, young and elderly persons’ evacuation

Security Officers, Fire Marshals or other nominated persons will assist disabled visitors or staff from the building during fire evacuations.

Persons with disabilities which might affect their ability to evacuate rapidly, or which might impede others evacuating, should report to departmental management and ask for the Fire Emergency Plan. Arrangements for the safe evacuation of persons with disabilities are as follows:

- a) All persons are provided with comprehensive information (this Plan).
- b) Standard Personal Emergency Evacuation Plans (PEEPs) are set out in Appendix B. These are available to visitors and form the basis for individual PEEPs.
- c) Visitors with disabilities should make themselves known to departmental management, from whom they should receive information on the Standard PEEPs available, and guidance on what to do in an evacuation.
- d) Regular users of the building are consulted and their needs discussed and assessed with appropriate members of staff. Individual PEEPs are agreed, documented and implemented.

Refer to **Performance Standard**: Provision of Personal Emergency Evacuation Plans (PEEPs) and associated documents (Safety, Health & Environment Unit).

**Note** - Any University employees who adopt a voluntary role in relation to emergency evacuation, such as assisting a disabled person, will not be held personally liable for any injury or loss suffered while they are carrying out those duties in accordance with information, instruction and training they have received.

### 14. Presence of visitors, contractors, service providers etc

Building contractors, window cleaners, external security staff etc and other visitors (members of the public) may be present from time to time.

Where planned events exceed normal conditions and arrangements for evacuation, the Responsible Person or relevant Head of Department will ensure that a Fire Risk Assessment is undertaken and appropriate provisions made.

Relevant Heads of Departments (e.g. typically Estates) are responsible for ensuring that all contractors formally agree to all fire safety arrangements and are adequately informed and instructed, that Safe Systems of Work are adhered to throughout (e.g. Permit To Work forms), and that all Dangerous Substances present and their exact locations are declared and made known to appropriate persons (as necessary/relevant to sections 10, 11 & 16).

### 15. Shutdown/isolation of critical machines, appliances, processes, power supplies etc in the event of a fire

Control room operators should shut down main control room power if safe to do so (however, this is not a critical requirement) and report to the Building Fire Officer and/or Security Supervisor.
| 16. Specific arrangements, if necessary, for high fire risk areas of the workplace, and dangerous substances | No areas of the building are considered high fire risk.  
No significantly dangerous substances are normally present.  
If any dangerous substances are brought into the building (e.g. by staff, visitors or contractors) the following details must be given to the Building Fire Officer for each substance: chemical identity and/or trade name, quantity, location, brief details of use and storage, Material Safety Data Sheet, and name of person. The person concerned must report when the substance has been removed. |
| --- | --- |
| 17. Arrangements for an Emergency Plan to be used by a hirer of part of the premises | The Responsible Person ensures that  
- procedures are in place to ensure that this Plan, together with appropriate information and instruction, will be made available to any person or organization hiring, using or occupying the premises  
- any occupancy or activity not adequately addressed by the current Fire Risk Assessment and arrangements will be suitably assessed, controlled and planned for, in advance of the event. |
| 18. Contingency plans for when life safety systems, such as the fire detection & warning system, are out of order | In the event of temporary disablement of any critical system, management arrangements are in place to assess and provide suitable compensating features, practices or restrictions to ensure that an adequate level of protection is maintained to tolerable risk levels.  
Should a serious, widespread or significant disablement of a life safety system occur, the [affected parts of the] building must not be occupied without suitable and sufficient alternative arrangements in place.  
The Director of Estates is responsible for ensuring that planned temporary disablements (e.g. for building work) are risk assessed, authorised in advance, suitably monitored, and minimised in extent and duration. |
| 19. Fire information & instruction – students and visitors (non-academic/teaching/supervisory) | Specific information and instruction on  
- fire safety awareness  
- local fire safety features & procedures as per 20(a) below  
- ‘dos & don’ts’ is conveyed to students and visitors by means of briefings when first assembled in each area/space, and via occasional refreshers/reminders.  
This Fire Emergency Plan is available from the Building Fire Officer in both full and reduced (information sheet) formats.  
Information is also given on local Fire Action Notices. |
| 20. Fire training programme – all staff | (a) Local information, instruction and training is based on the arrangements described in this Fire Emergency Plan and includes the following:  
- The action to be taken on discovering a fire  
- The action to be taken when the fire alarm sounds  
- Familiarisation with the means of escape from the premises  
- Other relevant local features of the Emergency Plan such as fire marshalling, persons who may be in need of assistance, safe shutdown of critical equipment, etc  
- The location of the assembly point(s) |
Appreciation of the importance of fire resisting doors and of the need to close all doors in the event of a fire
- The location and safe use of fire fighting equipment
- Local fire safety awareness and prevention

(b) Generic fire safety training consists of the Safety, Health & Environment Unit’s “Fire & Safety Awareness” course or its equivalent. Alternative arrangements are available from the Safety, Health & Environment Unit for part-time sessional teachers etc.

Instruction, training and exercises should be carried out not less than once in each of the following periods:

Instruction and training For new staff, as above: (a) delivered immediately on induction and (b) arranged immediately, ideally for the next available course. The same or fully equivalent refresher training is carried out at not less than three year intervals.

Exercises (fire drills) At least every 12 months, preferably more frequently. The Responsible Person arranges these with reference to official guidance.

21. Fire training programme – nominated staff

As above (Section 20), and additionally as follows:

Users of fire fighting equipment: recognised specific fire extinguisher course (must include hands-on practical experience).

Fire Marshals, Door Wardens, Receptionists etc:
- (a) local briefing on their duties in relation to departmental & local arrangements for evacuation, and other assigned duties e.g. inspection
- (b) generic training consisting of the Safety, Health & Environment Unit’s “Fire Emergency Response” course or its equivalent

Persons nominated to assist those with disabilities: specific training as appropriate (e.g. use of Evac chairs) and specific briefing including content of relevant Personal Emergency Evacuation Plans and associated arrangements.

Academic staff: local briefing on evacuation arrangements and familiarity with the Fire Emergency Plan for all locations where they conduct lectures, tutorials, etc.

Relevant senior staff and managers:
- (a) suitably detailed briefing on this Emergency Plan and relevant local and departmental fire safety provisions, including coordination with neighbouring departments;
- (b) the Safety, Health & Environment Unit’s “Risk & Safety Management” course.
The same or fully equivalent **refresher training** is carried out at not less than three year intervals.

| 22. Fire safety arrangements: drawings and plans | Locations of the following fire safety features are indicated on drawings and plans held by Estates:
| | • essential structural features - layout, escape routes, doorways, walls, partitions, corridors, stairways;
| | • fire extinguishers;
| | • manually operated fire alarm call points and all other features of the fire alarm system;
| | • service intake shutoffs;
| | • other features (as per 23 below). |
| 23. Other fire safety systems | Nil |
1. **FIRE SAFETY RECORDS**

Records relating to fire safety precautions are kept in various locations as detailed below, and can be made available for inspection by any officer of the Fire Authority. Dates and details of training, inspection, testing and maintenance of the following are recorded:

- the means for detecting fire and for giving warning in case of fire (Estates);
- the means for fighting fire, i.e. extinguishers (inspection – SDFVA) (testing and maintenance – Estates);
- any smoke management, smoke control or smoke venting facility (Estates);
- the emergency escape lighting system (Estates);
- instruction and training (SDFVA and Safety, Health & Environment Unit); and
- fire drills (SDFVA and Safety, Health & Environment Unit).

Records should include:

- the date on which inspection, testing and maintenance was carried out and by whom;
- the date on which any defects were reported and the action taken to remedy such defects; and
- the date on which the defect was remedied and by whom.

2. **MEANS OF ESCAPE**

Escape routes (corridors, stairways, gangways, walkways etc.) and exits are sited as shown on the plan(s). Unless otherwise specifically approved via formal Fire Risk Assessment, all escape routes are kept free from

- potential sources of ignition
- combustible materials
- obstructions and trip hazards
- the holding open of designated fire doors, unless by a fire alarm linked release device.

3. **FIRE ALARM SYSTEM**

**INSPECTION**

The fire alarm control panel is checked on a daily basis to see that it indicates normal operation, or if not, that any fault shown is reported to Estates and remedial action taken. All faults are rectified without delay.

**TESTING AND MAINTENANCE**

Testing and maintenance is carried out in full compliance with legislation, guidance and applicable British Standards and/or as authorized by the Fire Service.

4. **LIGHTING**

All escape routes are adequately lit when the premises are in use. External lighting must switch on automatically when there is insufficient daylight, or individual lights may be operated by an internal switch next to the nearest exit door.

5. **ESCAPE LIGHTING**
The emergency lighting system utilizes self-contained battery operated luminaires, trickle charged from the main electrical supply coming into operation on failure of the local mains lighting. The batteries have sufficient capacity to operate the luminaires for not less than one hour. All component units of the system are located as indicated on the plans. The lamps will remain lit by emergency power for one hour and provide enough illumination for safe evacuation and for reading of all "Exit" signs.

TESTING AND MAINTENANCE
Testing and maintenance is carried out in full compliance with legislation, guidance and applicable British Standards and/or as authorized by the Fire Service.

6. FIRE FIGHTING EQUIPMENT

First-aid fire fighting equipment is distributed throughout the building as shown on the plan(s). All fire extinguishers conform to British Standard EN 3 and are hung on wall brackets with the base of the extinguisher at a suitable height for use by the occupants of the building, or they are sited in permanent Fire Points. The extinguishers are of a suitable size and weight for use by the occupants of the building.

Departmental managers are responsible for nominating and training a suitable number of persons in the use of fire fighting equipment, as/where necessary.

INSPECTION
Local staff are nominated by departmental management to carry out monthly recorded checks on fire fighting equipment to ensure that it is present and apparently fully operational.

TESTING AND MAINTENANCE:
Testing and maintenance is carried out in full compliance with legislation, guidance and applicable Standards.

7. FIRE SAFETY INSPECTIONS, AUDITS & RISK ASSESSMENTS

All staff should be encouraged to maintain awareness and check for fire safety defects and deficiencies. Nominated persons (typically Fire Marshals) should be tasked with unrecorded weekly inspections of fire safety equipment, features and practice in their designated areas.

Nominated persons (typically Fire Marshals) carry out monthly recorded checks on fire fighting equipment to ensure that it is present and apparently fully operational.

Suitable nominated persons (typically Fire Marshals) should conduct quarterly inspections of appropriately designated areas using simple checklists or similar. These provisions should be coordinated between departments as necessary, so that the entire building is covered. The checklists are passed to the appropriate responsible person(s) who will take appropriate steps to correct any deficiencies – if necessary, via Estates and/or the primary Responsible Person. A note of these actions and the date of their completion should be made on the checklist.

The University’s Fire Safety Adviser carries out, or arranges and compiles, a full Fire Safety Audit and/or Fire Risk Assessment Review at least once every two years. Various staff of departments occupying and/or managing the building will be required to assist or participate in this process.
**STANDARD PERSONAL EMERGENCY EVACUATION PLANS**
for persons with disabilities

The following matrix of Standard PEEPs is based on HM Government guidance ‘Means of Escape for Disabled people’. Visitors to the building should contact the Building Fire Officer (01227 (82)7941) and ask for the Fire Emergency Plan. They should discuss their needs and specify (a) which of the following options are suitable for them, and (b) whether any additional provisions are required. In many cases a combination of several Standard PEEPs will apply.

The use of mobile phones should not be discounted (Reception and/or building Security should ask for and record phone numbers) but emergency evacuation provisions must not rely on them.

Options shown in grey are not currently available in this building.
