REGULATORY REFORM (FIRE SAFETY) ORDER 2005

FIRE EMERGENCY PLAN

This Emergency Plan has been developed following fire risk assessments of the relevant building.

The purpose of the Plan is

- to ensure the safety of all persons in the event of a fire
- to ensure compliance with the Regulatory Reform (Fire Safety) Order 2005
- to ensure adherence to official guidance and related Standards.

Copies of this Emergency Plan will be made available to any person on request.

Copies of the building Fire Risk Assessment are kept by the Responsible Person and the Safety, Health & Environment Unit, and are available for inspection by Fire Service officers and building occupants.

<table>
<thead>
<tr>
<th>1. Address of the premises to which this Fire Emergency Plan relates</th>
<th>Careers building</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Telephone number 01227 (82)3480, 3481</td>
</tr>
</tbody>
</table>

The current Fire Risk Assessment for these premises is available from building management or from the Safety, Health & Environment Unit.

| 2. Occupier of the premises | University of Kent – Careers and Employability Service |
| 3. Uses of the premises | Administrative, library resources, interviews etc. |
| 4. Responsible Person | The Head of Careers and Employability has primary executive responsibility for building management, and is therefore the Responsible Person (in conjunction with Council and the Vice Chancellor) within the meaning of the Regulatory Reform (Fire Safety) Order 2005. Telephone number (01227 82) 7595 |

5. Other management responsibilities for fire safety

Line managers have duties

- under the above legislation and associated official guidance,
- in accordance with the arrangements described in this Plan, and
- according to University policy (see Safety, Health & Environment Unit’s published guidance).

Sarah Skinner, Administrative Officer is the nominated Building Fire Officer and is responsible for overseeing fire safety arrangements in the building. Telephone number (01227 82)3481

The Fire Safety Adviser (Safety, Health & Environment Unit) reviews the Fire Risk Assessment for these premises on a periodic basis and in the event of any significant change.

<table>
<thead>
<tr>
<th>6. Fire warning arrangements</th>
<th>An electrical fire alarm system with manual call points and heat and smoke detectors is provided throughout the premises. The system and installation complies with BS5839 and associated guidance. Estates hold relevant plans.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The fire alarm panel is located adjacent to the main entrance. Alarm signals are relayed to Campus Watch. The alarm sound is a siren.</td>
</tr>
<tr>
<td></td>
<td>The system is tested at 08:45 every Tuesday. The alarm sounds twice for about 20 seconds.</td>
</tr>
</tbody>
</table>

Version 1.0, dated 19/07/2012
| 7. Action in the event of fire | On discovering a fire, persons should immediately retreat from the fire, raise the alarm at the nearest call point and evacuate. If an alarm call point is not available, they should telephone 3333 (or 01227 823333) from a safe place - this is the emergency Campus Watch number.

On hearing the alarm signal, all persons present should immediately and calmly evacuate the premises by the nearest available emergency escape route, and proceed to the Assembly Point as displayed on local Fire Action Notices.

Persons evacuating must
- obey Fire Marshals’ and Security Officers’ instructions;
- not stop to collect any personal belongings;
- proceed directly to the correct Assembly Point (locations are indicated on Fire Action Notices near to all alarm call points);
- remain there until officially instructed otherwise.

Campus Watch will telephone the Fire & Rescue Service in accordance with current local procedures. |
| --- | --- |
| 8. Emergency escape routes | Emergency escape routes are clearly signed, and are kept immediately available and unobstructed at all times.

All users of the building should ensure they are fully aware of both obvious/familiar and alternative escape routes. |
| 9. Arrangements for fighting fires | Fire fighting equipment is provided as determined by fire risk assessment, and maintained.

Persons with no specific training are not expected to fight a fire, but all occupants and staff should familiarise themselves with the location and basic operating principles of the equipment, in case they need to use it (i.e. only in order to effect their escape, if cut off by fire).

Departmental management is responsible for nominating and training persons to use fire fighting equipment, as necessary and/or determined by fire risk assessment.

Campus Watch (Security) staff are nominated and trained to use the fire fighting equipment provided. |
| 10. Procedures for coordinating evacuation and for | Campus Watch Security respond immediately to any fire alarm signal. On arrival, the Security Supervisor will usually take charge of the building. |
| Liaising with the fire brigade | Arrangements are in place for collating information from Fire Marshals, to confirm complete successful evacuation of the premises, or otherwise. The Security Supervisor or Receptionist will give the following information to the officer-in-charge of the first fire appliance to arrive:  
- whether the building is known to be fully evacuated; or whether persons remain in the building; or which areas have not been checked;  
- any dangerous substances stored in the building that are likely to become involved (see sect. 16) including substances known/logged as temporarily present;  
- where the seat of the fire is thought to be located; and  
- the best route to get to trapped persons or the seat of the fire.  
During inclement weather, the decision may be taken to accommodate evacuated persons in an adjacent building. |
|---|---|
| **11. Other key responsibilities in the event of fire** | Arrangements ensure that adequate Fire Marshals and/or other nominated, trained staff are available at all practicable material times for:  
- checking that each designated area is clear of all personnel, and closing doors and windows if safe to do so;  
- directing evacuating persons to the assembly point;  
- reporting each area as clear (or otherwise) to the Security Supervisor;  
- preventing persons from entering the building;  
- assisting persons with disabilities; and  
- conducting regular fire safety inspections.  
Staff have responsibility for ensuring that all students and visitors present evacuate safely to the final assembly point, and for reporting that the area is clear (or otherwise) to a Fire Marshal or the person in charge of the building.  
Note - Any University employees who adopt a voluntary role in relation to emergency evacuation, such as that of Fire Marshal, will not be held personally liable for any injury or loss suffered while they are carrying out those duties in accordance with information, instruction and training they have received.  
Security Officers will, insofar as practicable, undertake the following, priority being given to areas closest to the alarm activation:  
- check that each designated area is clear of all personnel and close doors, if safe to do so;  
- direct evacuating persons to the assembly point;  
- report each area as clear (or otherwise) to the Security Supervisor; |
- prevent persons from entering the building; and
- attack fires with available fire-fighting equipment if trained and safe to do so

| 12. Persons who are especially at risk | Fire risk assessment has determined that no persons are considered to be especially at risk from fire, provided that all relevant fire safety arrangements, as described in this Plan and the Fire Risk Assessment for the building, are fully implemented and maintained.

Regular occupants and visitors do not include Young Persons. The occasional presence of Young Persons is covered by constant supervision, Fire Marshalling and the general Fire Emergency Plan. |

| 13. Special arrangements for disabled, young and elderly persons’ evacuation | Fire Marshals or other nominated persons will assist disabled persons from the building during fire evacuations.

Persons with disabilities which might affect their ability to perceive and respond to the alarm signal and/or to evacuate promptly, or which might impede others evacuating, should report to local management in the first instance. Arrangements for the safe evacuation of persons with disabilities are as follows:

(a) All persons are provided with appropriate information.
(b) Generic Emergency Evacuation Plans are set out in Appendix B. These are available to visitors and form the basis for Personal Emergency Evacuation Plans (PEEPs).
(c) Visitors with disabilities should make themselves known to Reception and/or departmental management where they should receive information on the facilities available, and guidance on what to do in an evacuation.
(d) Regular users of the building are consulted and their needs discussed and assessed with appropriate members of staff. Individual PEEPs are agreed, documented and implemented.

Refer to Performance Standard: Provision of Personal Emergency Evacuation Plans (PEEPs) and associated documents (Safety, Health & Environment Unit).

Note - Any University employees who adopt a voluntary role in relation to emergency evacuation, such as assisting a disabled person, will not be held personally liable for any injury or loss suffered while they are carrying out those duties in accordance with information, instruction and training they have received. |

| 14. Presence of visitors, contractors, service providers etc | Building contractors, window cleaners, external security staff etc and other visitors (members of the public) may be present from time to time.

Where planned events exceed normal conditions and arrangements for evacuation, the Responsible Person or relevant Head of Department will ensure that a Fire Risk Assessment is undertaken and appropriate provisions made.

Relevant Heads of Departments (typically Estates or Kent Hospitality unless works are otherwise arranged) are responsible for ensuring that all contractors formally agree to all fire safety arrangements and are adequately informed and instructed, that Safe Systems of Work are adhered to throughout (e.g. Permit To Work arrangements), and that all Dangerous Substances present and their exact locations are declared and made known to appropriate persons (as necessary/relevant to

</tbody>
</table>
| 20. | Fire training programme – all staff (including fire drills) | (a) Local information, instruction and training is based on the arrangements described in this Fire Emergency Plan and includes the following:  - The action to be taken on discovering a fire  - The action to be taken when the fire alarm sounds  - Familiarisation with the means of escape from the premises  - Other relevant local features of the Emergency Plan such as fire marshalling, persons who may be in need
of assistance, safe shutdown of critical equipment, etc
- The location of the assembly point(s)
- Appreciation of the importance of fire resisting doors and of the need to close all doors in the event of a fire
- The location and safe use of fire fighting equipment
- Local fire safety awareness and prevention

(b) Generic fire safety training consists of the Safety, Health & Environment Unit’s “Fire & Safety Awareness” course or its equivalent.

Instruction, training and exercises should be carried out not less than once in each of the following periods:

Instruction and training For new staff, as above: (a) delivered immediately on induction and (b) arranged immediately, ideally for the next available course. The same or fully equivalent refresher training is carried out at not less than three year intervals.

Exercises (fire drills) At least every 12 months, preferably more frequently. The Responsible Person arranges these with reference to official guidance.

21. Fire training programme – nominated staff

As above (Section 20), and additionally as follows:

Users of fire fighting equipment: recognised specific fire extinguisher course (must include hands-on practical experience).

Fire Marshals, Door Wardens, Receptionists etc:
- (a) local briefing on their duties in relation to departmental & local arrangements for evacuation, and other assigned duties e.g. inspection
- (b) generic training consisting of the Safety, Health & Environment Unit’s “Fire Emergency Response” course or exact equivalent

Persons nominated to assist those with disabilities: specific training as appropriate (e.g. use of Evac chairs) and specific briefing including content of relevant Personal Emergency Evacuation Plans and associated arrangements.

Academic staff: local briefing on evacuation arrangements and familiarity with the Fire Emergency Plan for all locations where they conduct lectures, tutorials, etc.

Relevant senior staff and managers:
- (a) suitably detailed briefing on this Emergency Plan and relevant local and departmental fire safety provisions, including coordination with neighbouring departments;
(b) the Safety, Health & Environment Unit’s “Risk & Safety Management” and “Fire Emergency Response” (full version) courses.

The same or fully equivalent refresher training is carried out at not less than three year intervals.

| 22. Fire safety arrangements: drawings and plans | Locations of the following fire safety features are indicated on drawings and plans held by Estates:

- essential structural features - layout, escape routes, doorways, walls, partitions, corridors, stairways;
- means for fighting fire - fire extinguishers, hose reels, fire blankets;
- manually operated fire alarm call points and all other features of the fire alarm system;
- the electrical supply intake, the main water shut-off valve and the main gas shut-off valves;
- other features (as per 23 below). |

| 23. Fire safety systems | At least one fire door is provided with an alarm-activated automatic hold-back device. |
1. **FIRE SAFETY RECORDS**

Records relating to fire safety precautions are kept in various locations as detailed below, and can be made available for inspection by any officer of the Fire Authority. Dates and details of training, inspection, testing and maintenance of the following are recorded:

- the means for detecting fire and for giving warning in case of fire (Estates);
- the means for fighting fire, i.e. portable extinguishers (inspection – Careers) (testing and maintenance – Estates);
- the emergency escape lighting system (Estates);
- instruction and training (Careers and Safety, Health & Environment Unit); and
- fire drills (Careers and Safety, Health & Environment Unit).

Records should include:

- the date on which inspection, testing and maintenance was carried out and by whom;
- the date on which any defects were reported and the action taken to remedy such defects; and
- the date on which the defect was remedied and by whom.

2. **MEANS OF ESCAPE**

Escape routes (corridors, stairways, gangways, walkways etc.) and exits are sited as shown on the plan(s). Unless otherwise specifically approved via formal Fire Risk Assessment, all escape routes are kept free from:

- potential sources of ignition
- combustible materials
- obstructions and trip hazards
- the holding open of designated fire doors, unless by a fire alarm linked release device.

3. **FIRE ALARM SYSTEM**

INSPECTION

The fire alarm control panel is checked on a daily basis to see that it indicates normal operation, or if not, that any fault shown is reported to Estates and remedial action taken. All faults are rectified without delay.

TESTING AND MAINTENANCE

Testing and maintenance is carried out in full compliance with legislation, guidance and applicable British Standards and/or as authorized by the Fire Service.

4. **LIGHTING**

All escape routes are adequately lit when the premises are in use. External lighting must switch on automatically when there is insufficient daylight, or individual lights may be operated by an internal switch next to the nearest exit door.

5. **ESCAPE LIGHTING**
The emergency lighting system utilises self-contained battery operated luminaires, trickle charged from the main electrical supply coming into operation on failure of the local mains lighting. The batteries have sufficient capacity to operate the luminaires for not less than one hour. All component units of the system are located as indicated on the plans. The lamps will remain lit by emergency power for one hour and provide enough illumination for safe evacuation and for reading of all "Exit" signs.

**TESTING AND MAINTENANCE**

Testing and maintenance is carried out in full compliance with legislation, guidance and applicable British Standards and/or as authorized by the Fire Service.

6. **FIRE FIGHTING EQUIPMENT**

First-aid fire fighting equipment is distributed throughout the building as shown on the plan(s). All fire extinguishers conform to British Standard EN 3 and are hung on wall brackets with the base of the extinguisher at a suitable height for use by the occupants of the building, or they are sited in permanent Fire Points. The extinguishers are of a suitable size and weight for use by the occupants of the building.

Departmental managers are responsible for nominating and training a suitable number of persons in the use of fire fighting equipment, as/where necessary.

**INSPECTION**

See Appx A Section 7 para. 2 below.

**TESTING AND MAINTENANCE:**

Testing and maintenance is carried out in full compliance with legislation, guidance and applicable Standards.

7. **FIRE SAFETY INSPECTIONS, AUDITS & RISK ASSESSMENTS**

All staff should be encouraged to maintain awareness and check for fire safety defects and deficiencies. Nominated persons (typically Fire Marshals) should be tasked with unrecorded weekly inspections of fire safety equipment, features and practice in their designated areas.

Nominated persons (typically Fire Marshals) carry out monthly recorded checks on fire fighting equipment to ensure that it is present and apparently fully operational.

A full Fire Safety Audit and/or Fire Risk Assessment Review must be conducted at least once every two years, or in accordance with the safety, Health & Environment Unit's schedule, and prior to and/or in the event of significant change or any significant incident. Various staff occupying and/or managing the building will be required to assist or participate in this process.
STANDARD PERSONAL EMERGENCY EVACUATION PLANS
for persons with disabilities

The following matrix of Standard PEEPs is based on HM Government guidance ‘Means of Escape for Disabled people’, and elements of BS 9999:2008. Visitors to the building should report to Reception and ask for the Fire Emergency Plan. They should discuss their needs and specify (a) which of the following options are suitable for them, and (b) whether any additional provisions are required. In many cases a combination of several Standard PEEPs will apply.

The use of mobile phones should not be discounted (Reception and/or building Security should ask for and record phone numbers) but emergency evacuation provisions must not rely on them.

**Options shown in grey are not applicable in this building.**
