

Revised schedule for the Algebraic Transformation Groups workshop
All talks are in Keynes Seminar Room 15

Tuesday

13:30-14:00 Chris Gill (Prague)

Tensor products of Young modules and p -multiples of partitions

14:15-14:45 Jorge Ferreira (Madeira)

The Invariant Fields of the Sylow p -subgroups of Finite Classical Groups

15:00-15:30 Emilie Dufresne (Basel)

The separating variety for representations of the additive group

15:45-16:15 Jon Elmer (Bristol)

Separating invariants and localisation

Wednesday

13:30-14:00 Shawn Baland (Aberdeen)

Modules of constant Jordan type for elementary abelian p -groups

14:05-14:35 Radu Stancu (Amiens)

Fusion systems for profinite groups.

14:45-15:15 Mufit Sezer (Bilkent)

On modular invariants of the Klein-four group

15:20-15:50 Martin Kohls (TU Munich)

The Dihedral groups in characteristic 2: Invariants, Coinvariants, and Gröbner Bases

16:00-16:30 Ami Braun (Haifa)

The Gorenstein property and modular invariants

Revised 29.3.2012
