**Annex 2: Qualification Level Descriptors**

Each module and course within the University Credit Framework must be at one and only one of levels 3 through to 8.

The University has adopted, as the definitions of levels 4 to 8, the qualification level descriptors as set out in the *Framework for Higher Education Qualifications for England, Wales and Northern Ireland* (FHEQ), published by the Quality Assurance Agency for Higher Education (QAA), which are reproduced in Table A below. The University definition of level 3 is the descriptor as proposed by the Southern England Consortium for Credit Accumulation and Transfer in Credit Level Descriptors for Further and Higher Education, January 2003.

The QAA describes qualification level descriptors thus:

“Descriptors exemplify the nature and characteristics of the main qualification at each level, and comparison demonstrates the nature and characteristics of change between qualifications at different levels. They provide clear points of reference at each level and describe outcomes that cover the great majority of existing qualifications.”

**Table A**

<b>Level</b>	<b>Qualifications at the level indicated are awarded to students who have demonstrated:</b>	<b>Typically, holders of a qualification at the level indicated will be able to:</b>	<b>And will have:</b>
<b>3</b>	i) a limited factual and conceptual knowledge base, with some appreciation of the breadth of the field of study and the relevant terminology; ii) an ability to apply the skills of analysis, synthesis, evaluation independently in relatively simple and familiar contexts, or with guidance or structure when working with greater complexity;	a) apply knowledge and skills within a defined context and evaluate own strengths and weaknesses within criteria largely set by others; b) within a defined context, manage information and collect data from a range of straightforward sources c) apply given tools/methods to a well-defined problem and show emerging recognition of the complexity of associated issues;	d) the qualities and transferable skills to enable them to operate in predictable, defined contexts that require use of a specified range of standard techniques.
<b>4</b>	i) knowledge of the underlying concepts and principles associated with their area(s) of study, and an ability to evaluate and	a) evaluate the appropriateness of different approaches to solving problems related to their area(s) of study and/or	d) the qualities and transferable skills necessary for employment requiring the exercise of some
