10. A synopsis of the curriculum
This module investigates methods of creating work for performance.

The focus of the first term is action and reaction – advancing students’ ability to convey emotional honesty and intimacy on stage, drawing from tools developed in realistic and naturalistic modes of performance. The curriculum will focus on such concepts as psycho-physical awareness, public solitude, and working with objectives. There may also be some introduction to text work.

The focus of the second term is devising, exploring different approaches to generating performance material through exercises and rehearsals. Classes will examine creating from stimulus, and students will engage with a range of devising techniques. Basic dramaturgical methods for refining material at different stages of a creation process will also be explored. When possible, this element of the module will be delivered by a visiting practitioner or company who will introduce the students to their distinct approach.
