UNIVERSITY OF KENT

MODULE SPECIFICATION TEMPLATE

SECTION 1: MODULE SPECIFICATIONS

1. Title of the module:
   Module A: Clinical Practice in Dental Nursing

2. School or partner institution which will be responsible for management of the module:
   Centre for Professional Practice (HE KSS Dental)

3. Start date of the module:
   September 2014

4. The number of students expected to take the module:
   12 (rising to a maximum of 72 in subsequent cohorts).

5. Modules to be withdrawn on the introduction of this proposed module and consultation with other relevant Schools and Faculties regarding the withdrawal:
   None

6. The level of the module (e.g. Certificate [4], Intermediate [5], Honours [6] or Postgraduate [7]):
   Level 4

7. The number of credits and the ECTS value which the module represents:
   15 Credits (7.5 ECTS)

8. Which term(s) the module is to be taught in (or other teaching pattern):
   Autumn
   Term times will be from the beginning of September until the end of December. Specific dates will be provided within the Programme Handbook

9. Prerequisite and co-requisite modules:
   Co-requisite with modules B, C and D.

10. The programmes of study to which the module contributes:
    FdSc in Advanced Dental Nursing

11. The intended subject specific learning outcomes:
    On successful completion of the module students will be able to:
    11.1 Demonstrate developed knowledge and understanding of aspects of biomedical and behavioural sciences, general and oral anatomy and physiology, disease and abnormalities relevant to the patient care process, including individual patient care and management and patient and public safety.
    11.2 Demonstrate the ability to understand and evaluate the dental nurse contribution to all aspects of patient assessment and management, record keeping, treatment planning, recognition and treatment of acute oral conditions and/or medical emergencies.
    11.3 Demonstrate developed knowledge and understanding of evidence-based best practice in relation to his/her contribution to treatment including the clinical environment, infection prevention and decontamination, supporting colleagues, dental materials and radiography.
11.4 Interpret and ethically apply the evidence-based principles of individual health promotion and disease prevention, and population based health and care, which recognises the needs of different patient groups and incorporates the psychological and sociological aspects of health, illness, behaviour change and disease.

12. **The intended generic learning outcomes:**

   On completion of this module students would be able to

   12.1 Demonstrate the capacity for autonomous learning and ability to evaluate arguments, assumptions, concepts and data to make informed judgements.

   12.2 Communicate with clarity in academic and professional/work settings demonstrating regard to interpersonal skills to both specialist and non-specialist audiences.

   12.3 Demonstrate ability to apply reflection and self-understanding when working with others, in order to evaluate own strengths and weaknesses and commitment to lifelong learning and continuous professional and personal self development.

   12.4 Demonstrate the ability to research, manage, appraise and present material, data and scientific literature through word-processing, computer-based presentation and use of the internet.

13 **A synopsis of the curriculum:**

   This module is designed to provide knowledge and skills in the areas of human, biomedical and behavioural sciences related to the patient care process within the clinical environment, and relevant to the dental nurse role. The module will progress from the basic understanding of physiology, biology and the oral anatomy and promote understanding of the needs of different patient groups. Students will be asked to discuss the dental nurse contribution to patient assessment and management, including the recognition and management of a medical emergency. Students will gain an understanding of, and be able to demonstrate their contribution to, evidence-based practice and principles in relation to patient safety within the clinical environment. In addition, this module will provide an introduction to the psychological and sociological aspects of both individual and population based health promotion and disease prevention.

14 **Indicative Reading List :**

   **Core Text:**

   Students may be asked to read additional material.

   **Recommended Text:**

   **Background:**

   HTM 0105 Updated Nov 2009

Learning and Teaching Methods, including the nature and number of contact hours and the total study hours which will be expected of students, and how these relate to achievement of the intended module learning outcomes:

This module will be delivered via face-to-face taught sessions over two weekends and supported with a preparation guided study package issued prior to attendance and to be completed by the student prior to the taught delivery.

Teaching will primarily be delivered in the forms of tutor led large group lecture sessions and followed up with small peer group and tutor led seminar discussion and study sessions. Both tutors with specialist expertise and those actively working in the dental sector will deliver the theoretical input.

1:1 face to face tutorials are intended to be student focussed and to concentrate on covering any area of the module content, learning outcomes or other area identified to advance learning.

A division of the 150 hours of learning required for this module is outlined below:

16 Assessment methods and how these relate to testing achievement of the intended module learning outcomes:

The assessment comprises a single assignment. The teaching sessions will provide opportunities within the timetable to review and consider the assignment within the seminar groups. Students will be able to gain further individual support and formative feedback through the seminar and 1:1 tutorial sessions. A pass must be gained to successfully complete the module.

17. Implications for learning resources, including staff, library, IT and space

None.
18. The Collaborative Partner recognises and has embedded the expectations of current disability equality legislation, and supports students with a declared disability or special educational need in its teaching. Within this module we will make reasonable adjustments wherever necessary, including additional or substitute materials, teaching modes or assessment methods for students who have declared and discussed their learning support needs. Arrangements for students with declared disabilities will be made on an individual basis, in consultation with the University’s/Collaborative Partner’s disability/dyslexia support service, and specialist support will be provided where needed.

19. Campus(es) where module will be delivered: HEKSS has a number of Post Graduate Education Centres (PGECs) available with both clinical and academic teaching facilities. Most of the teaching and training is expected to take place at the Holiday Inn Conference Facility at Gatwick, West Sussex. The exact location will be chosen according to student numbers and to reflect students’ geographical location and may include: Holiday Inn Conference Facility, Gatwick, West Sussex; Guildford Education Centre, Royal Surrey County Hospital, Surrey; The Education and Training Centre, Tunbridge Wells Hospital, Pembury, Tunbridge Wells, Kent; PGEC, Kent and Canterbury Hospital, Canterbury, Kent; PGEC, East Surrey Hospital, Redhill, Surrey.

*If the module is part of a programme in a Partner College or Validated Institution, please complete the following:*
